Subject: Microsoft Settlement

bad settlement. it will not accomplish the intent. MS has not mended it's abusive domineering ways one iota. They are the 800lb gorilla standng in the way of innovation and healthy competition. We consumer have little choice but to be led about by the nose by MS as they continue to pour out new versions of buggy insecure bloatware. Only by viable true competition will they be forced to focus on improving their product not just their bottom line.
